<i>Item #</i>	<i>Variable</i>	<i>Variable Label</i>	<i>Response Values and Labels</i>
Weights			
<i>NSSE creates weights for randomly selected first-year and senior respondents based on part-time/full-time status and gender. Use weights to replicate NSSE benchmark scores, means, and the frequency column percentages. However, we encourage schools interested in intra-institutional weighting to consider a more sophisticated weighting system that takes into account response rate differences among additional student subpopulations. NSSE's weights are not appropriate for intra-institutional comparisons in most cases as the response rate differences among subgroups may not be the same as the ones that exist institution-wide at your school. Both weights listed below will reproduce your institution's report statistics, but the N's will differ. See NSSE's website for more detailed information about this topic.</i>			
	WEIGHT1	Replicates the original number of respondents for each institution and is used to produce means, frequency, and benchmark statistics for each institution.	
	WEIGHT2	Multiplies the number of respondents to match the institution's overall population size.	

Student-Level Benchmark Scores. To facilitate conversations about student engagement and its importance to student learning, collegiate quality, and institutional improvement, NSSE created five institution-level indicators or benchmarks of effective educational practice: (1) Level of Academic Challenge; (2) Active and Collaborative Learning; (3) Student-Faculty Interaction; (4) Enriching Educational Experiences; and (5) Supportive Campus Environment. Student-level benchmark scores, the precursors to these five institution-level benchmarks, are the student's average responses to items within the group, after all items have been placed on a 100-point scale. Student-level benchmark scores are created for randomly sampled first-year and senior students that answered three-fifths or more of the items within the group. Not only can institutions replicate their benchmark scores with this information, but they can also perform intra-institutional comparisons (e.g., department, college, etc.) to dig deeper into their data. The benchmark score for an institution is the *weighted mean* of these student-level scores. For more detailed information about how benchmarks are calculated, visit the NSSE Web site at www.nsse.iub.edu/html/2008_inst_report.htm.

<i>Variable</i>	<i>Description</i>	<i>Component Items</i>
AC	Level of Academic Challenge: Index that measures time spent preparing for class, amount of reading and writing, deep learning, and institutional expectations for academic performance.	readasgn, writemor, writemid, writesml, analyze, synthesz, evaluate, applying, workhard, acadpr01, envschol
ACa	Level of Academic Challenge (adjusted): Same as AC, but adjusted for part-time enrollment status. This is the version given in your Benchmark Comparisons report. Because part-time students spend less time in classes, they are likely to report lower numbers for several items on the questionnaire (e.g., hours spent preparing for class, number of papers written, number of assigned books read). Using full-time/part-time ratios from the entire U.S. NSSE cohort, we adjust part-time student scores to make them resemble those of full-time students when we create the benchmarks. Thus schools with large populations of part-time students are not negatively impacted by this population.	readasgn, writemor, writemid, writesml, analyze, synthesz, evaluate, applying, workhard, acadpr01, envschol
ACL	Active and Collaborative Learning: Index that measures extent of class participation, working collaboratively with other students inside and outside of class, tutoring and involvement with a community-based project.	clquest, clpresen, classgrp, occgrp, tutor, commproj, oocideas
SFI	Student-Faculty Interaction: Index that measures extent of talking with faculty members and advisors, discussing ideas from classes with faculty members outside of class, getting prompt feedback on academic performance, and working with faculty on research projects	facgrade, facideas, facplans, facfeed, facother, resrch04
SFc	Student-Faculty Interaction (comparative): Same as SFI, but excludes the <i>resrch04</i> item (<i>rescaled in 2004</i>). Use for year-to-year comparisons with 2003, 2002, and 2001 administrations; not needed for comparisons with 2004 or 2005.	facgrade, facideas, facplans, facfeed, facother (Note: Excludes <i>resrch04</i> .)

<i>Variable</i>	<i>Description</i>	<i>Component Items</i>
EEE	Enriching Educational Experiences: Index that measures extent of interaction with students of different racial or ethnic backgrounds or with different political opinions or values, using electronic technology, and participating in activities such as internships, community service, study abroad, co-curricular activities, and culminating senior experience. (Note: Because question 7 was rescaled in 2004, year-to-year comparisons of <i>EEE</i> scores with years prior to 2004 are invalid.)	diffstu2, divrstud, envdivrs, cocurr01, itacadem, intern04, volIntr04, lrncom04, forIng04, stdabr04, indstd04, snrx04
SCE	Supportive Campus Environment: Index that measures extent to which students perceive the campus helps them succeed academically and socially, assists them in coping with non-academic responsibilities, and promotes supportive relations among students and their peers, faculty members, and administrative personnel and offices.	envsocial, envsuprt, envnacac, envstu, envfac, envadm
